District-Wide Data :

- EDI

Appendix D

What is the EDI?

- The EDI is a checklist, filled out by teachers on children between the ages of four and six years. It was developed by the Offord Centre for Child Studies at McMaster University in Canada. The UCLA Center for Healthier Children, Families, and Communities is implementing the EDI in the United States as part of a national initiative to improve the service systems that help children prepare for and succeed in school.

What does the EDI measure?

- The EDI is a holistic look at children because it measures all five of the developmental domains that are known to be predictive of later success in school and beyond. These five developmental domains are:
 - 1) Physical Health and Well-being;
 - 2) Social Competence;
 - 3) Emotional Maturity;
 - 4) Language and Cognitive Development; and
 - 5) Communication skills and General Knowledge.

Domain	Description
 Physical Health & Well-being	Absence of disease or impairment, access to adequate and appropriate nutrition, and gross and fine motor skills. Necessary gross and fine motor abilities to complete common kindergarten and first grade tasks, including items such as controlling a pencil or turning pages without tearing the pages.
 Social Competence	Children need to meet general standards of acceptable behavior in public places, control their behavior, cooperate with others, show respect for adult authority, and communicate feelings and needs in a socially acceptable manner.
 Emotional Maturity	Emotional maturity is characterized by a balance between a child's curiosity about the world, an eagerness to try new experiences, and some ability to reflect before acting. A child who is fearful and reluctant to engage in new activities misses learning opportunities that are seized upon by a child with a positive approach to life.
 Language & Cognitive Development	Language skills refer to vocabulary size and a child's ability to name letters and attend to the component sounds within words. Cognitive skills involve the ways in which children perceive, organize, and analyze information.
 Communication Skills & General Knowledge	Children must be able to understand verbal communications with other adults and children and to verbally communicate experiences, ideas, wishes, and feelings in a way that can be understood by others.

LCAP Goal 2:

- English Learners will become proficient in English while engaging in a rigorous, culturally and linguistically responsive, standards-aligned core curriculum
