

SCHOOL QUARANTINE FLOW CHART

You must quarantine

You may end your quarantine after either:

- Ten (10) full days from your last known contact. Activities resume on Day 11.

OR

- Five (5) full days from your last known contact if you have a negative viral test collected on or close to Day 5. Activities may resume as early as Day 6.

Some students and staff under quarantine may remain in school if they do not develop symptoms and meet the criteria below:

- You are a student with a mask-on-mask school exposure and test negative at least once, preferably on a specimen collected on or around Day 5. **This modified testing cadence is applicable during the surge period only.** Ideally, these students should test twice: once as soon as possible and once again on or close to Day 5.
- You are staff and test negative on a specimen collected between Day 3-5.
- You wear a well-fitting mask and monitor for symptoms for 10 days.
- You quarantine at home when not at school.
