

Modernization Update #1

Webster Elementary School

A Fresh New Look for Webster!

Sept. 29, 2017

So much was accomplished this past summer...

As part of the districtwide Windows, Paint, Floors and Doors Project, Webster received a refreshing facelift over the summer including:

- Installation of more than 680 windows, approximately 109 doors, all new flooring and interior paint.
- Outside, the trim was repainted and accessibility upgrades were made.
- Work in progress includes:
 - Staff restroom reconstruction in the Cafetorium
 - The replacement of windows and doors in classrooms 13-16
 - Renovation of rooms 17-20, which will be completed in the last phase
- This project is funded through Measure ES and managed by the Facility Improvement Projects Department.

Please contact Chris Emmett, Construction Manager at cemmett@smmusd.org or Carey Upton, Chief Operations Officer cupton@smmusd.org with any questions.

Thank you parents, staff and students for your ongoing cooperation and patience while we complete the modernization work at Webster!
