Phase I Environmental Site Assessment Report

John Adams Middle School 2425 16th Street Santa Monica, California

Converse Project No. 17-41-135-06 February 22, 2022

**Prepared For:** 

Santa Monica-Malibu Unified School District 2828 4th Street Santa Monica, California 90405

**Prepared By:** 

Converse Consultants 717 South Myrtle Avenue Monrovia, California 91016

February 22, 2022

Mr. Julian F. Capata Santa Monica-Malibu Unified School District 2828 4th Street Santa Monica, California 90405

#### Subject: PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

John Adams Middle School 2425 16th Street Santa Monica, California Converse Project No. 17-41-135-06

Mr. Capata:

Converse Consultants (Converse) is pleased to submit the attached report that summarizes the activities and the results of a Phase I Environmental Site Assessment (Phase I ESA) that was conducted at the referenced property.

A summary of the assessment is presented in the Executive Summary, as well as in Sections 8.0, 9.0, and 10.0 of the report. No Recognized Environmental Conditions were identified during this assessment.

We appreciate the opportunity to be of service. Should you have any questions or comments regarding this report, please contact Norman Eke at (626) 930-1260.

## **Executive Summary**

The following is an Executive Summary of the Phase I Environmental Site Assessment (Phase I ESA) that was conducted by Converse Consultants (Converse). Please refer to the appropriate sections of the report for a complete discussion of these issues. In the event of a conflict between this Executive Summary and the report, or an omission in the Executive Summary, the report shall prevail.

This report presents the results of the Converse Phase I ESA performed at John Adams Middle School at 2425 16th Street in the City of Santa Monica, Los Angeles County, California, referred to as the Subject Property in this report. Converse was retained by the Santa Monica-Malibu Unified School District to conduct this Phase I ESA. Our study has been conducted in order to identify, to the extent practical within the scope of an ESA, Recognized Environmental Conditions (RECs) in connection with the Subject Property.

Converse has compiled and reviewed information that was obtained from interviews, document research, and on-site and area reconnaissance to identify potential environmental conditions at the Subject Property in conformance with the ASTM Standard E: 1527-13/-21 Environmental Site Assessment Standard Practice (ASTM Standard: E1527-13/-21). In addition, Department of Toxic Substances Control (DTSC) Guidance on school site evaluation was followed; and a California Department of Education (CDE) checklist was completed per the RFP dated December 8, 2021 and the User's instructions.

This assessment has revealed no evidence of *recognized environmental conditions, controlled recognized environmental conditions,* or *significant data gaps* in connection with the Subject Property. However, further assessment is recommended based on the following environmental concerns that were identified:

• Based on review of historical information and the Department of Toxic Substances Control (DTSC) Guidance on school site evaluation, soil sampling with regards to lead from lead-base paint is recommended for all on-site structures built prior to 1994. Soil sampling with regards to organochlorine pesticides from termiticide application is recommended for all on-site structures built prior to 1989. This excludes auditorium/performing arts complex additions in the recent past, as well as the clubhouse building which was installed after 1994.

## **1.0 Introduction**

#### 1.1 Purpose and Scope of Services

This report presents the results of the Converse Consultants (Converse) Phase I Environmental Site Assessment (ESA) performed at John Adams Middle School at 2425 16th Street in the City of Santa Monica, Los Angeles County, California, referred to as the Subject Property in this report. Converse was retained by the Santa Monica-Malibu Unified School District to conduct this Phase I ESA.

Our study has been conducted in order to identify, to the extent practical, Recognized Environmental Conditions (RECs) in connection with the Subject Property. The term Recognized Environmental Conditions is defined in Section 1.1.1 of the American Society of Testing and Materials (ASTM) Standard Practice as the presence or likely presence of any hazardous substances or petroleum products in, at or on a property due to any release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

This Phase I ESA was completed in accordance with our proposal dated December 13, 2021. Department of Toxic Substances Control (DTSC) Guidance on school site evaluation was followed. Our work consisted of the following and was completed in general conformance with the scope and limitations of the ASTM Practice E1527-13/-21 and complies with standards and practices set forth in 40 Code of Federal Regulations (CFR) Part 312 for AAI.

- Interviews with the Subject Property owner representatives
- Subject Property and vicinity reconnaissance
- Review of regulatory agency records
- Description of physical setting
- Historical review
- Interviews with public agency personnel
- Preparation of this report

In addition to the ASTM and AAI requirements, a California Department of Education (CDE) checklist was completed per the RFP dated December 8, 2021 and the User's instructions as follows:

Ed. Code 17213 (a): This assessment has revealed no evidence that the Subject Property is the site of a current or former hazardous waste disposal site or solid waste disposal site.

Ed. Code 17213(a)(2): This assessment has revealed no evidence that the Subject Property is a hazardous substance release site identified by the Department of Toxic Substances Control.

Ed. Code 17213(a)(3): This assessment has revealed no evidence that the Subject Property contains one or more pipelines, situated underground or aboveground, that carries hazardous substances, extremely hazardous substances, or hazardous wastes.

5 CCR 14010(c): No power line easements for power lines above 16 kV were identified within 350 feet of the Subject Property.

5 CCR 14010(d): No railroad track easements were identified within 1,500 feet of the Subject Property.

5 CCR 14010(g): The FEMA Flood Map Service Center website was reviewed (https://msc.fema.gov/portal/home). According to the website, the Subject Property is located in an area of minimal flood hazard (Zone X).

5 CCR 14010(h): The PHMSA online mapping system for gas transmission pipelines and hazardous liquid pipelines was reviewed (https://www.npms.phmsa.dot.gov/PublicViewer/). The Subject Property is not located within 1,500 feet of the easement of an above ground or underground pipeline.

5 CCR 14010(t): No significant disposal of hazardous waste was identified in the EDR database report within 2,000 feet of the Subject Property.

A copy of the CDE checklist is provided in Appendix G.

#### 1.2 Non-Scope Considerations

There are a number of non-scope issues which are sometimes assessed concurrently with a Phase I ESA. Unless specifically agreed in the contract proposal documents, these non-scope considerations are not included as part of the Phase I ESA. Examples of non-scope issues include:

- Asbestos-containing Building Materials
- Biological Agents
- Cultural & Historic Resources
- Diffuse Anthropogenic Pollution
- Ecological Resources
- Emerging Chemicals/Contaminates
- Endangered SpeciesHealth & Safety
- Indoor Air Quality
- Industrial Hygiene
- Lead-base Paint
- Lead in Drinking Water
- Mold
- Non-liquid Polychlorinated Biphenyls
- Polyfluoroalkyl Substances
- Radon
- Regulatory Compliance
- Wetlands

Following the Department of Toxic Substances Control (DTSC) Guidance on school site evaluation, the following non-scope issues are discussed in this report (see Section 12.0, Additional Non Scope Services):

- Lead from lead-base paint
- Organochlorine pesticides from termiticide application
- Polychlorinated biphenyls from electrical transformers

#### 1.3 Significant Assumptions

No assumptions were made for this assessment that need to be noted as significant.

#### 1.4 Limitations and Expectations

No deviation(s) from the ASTM Standard Practice were encountered during this assessment.

#### 1.5 Special Terms and Conditions

No special terms or conditions were identified by the User.

#### 1.6 Reliance

This report is for the sole benefit and exclusive use of Santa Monica-Malibu Unified School District in accordance with the terms and conditions under which these services have been provided. Its preparation has been in accordance with generally accepted environmental practices. No other warranty, either express or implied, is made. The Scope of Services associated with the report was designed solely in accordance with the objectives, schedule, budget, and risk-management preferences of Santa Monica-Malibu Unified School District.

This report should not be regarded as a guarantee that no further contamination, beyond that which could be detected within the scope of this assessment, is present at the Subject Property. Converse makes no warranties or guarantees as to the accuracy or completeness of information provided or compiled by others. It is possible that information exists beyond the scope of this assessment. It is not possible to absolutely confirm that no hazardous materials and/or substances exist at the Subject Property. If none are identified as part of a limited scope of work, such a conclusion should not be construed as a guaranteed absence of such materials, but merely the results of the evaluation of the property at the time of the assessment. Also, events may occur after the Subject Property visit, which may result in contamination of the Subject Property. Additional information, which was not found or available to Converse at the time of report preparation, may result in a modification of the conclusions and recommendations presented.

Any reliance on this report by Third Parties shall be at the Third Party's sole risk. Should Santa Monica-Malibu Unified School District wish to identify any additional relying parties not previously identified, a completed Application of Authorization to Use (see Appendix A of this report) must be submitted to Converse Consultants.

| Location and Legal Description | The Subject Property is located at 2425 16th Street in the  |
|                                | City of Santa Monica, California. The Subject Property is   |
|                                | located on the east side of 16th Street, between Pearl  |
|                                | Street and Ocean Park Boulevard. The Subject Property   |
|                                | is located approximately 0.9-miles east of the juncture of  |
|                                | Interstate 10 and California State Route 1.   |
|                                | The Subject Property consists of one (1) parcel and<br>is approximately 11 acres. The Los Angeles County<br>Assessor's Parcel Number for the Subject Property is                    |
|                                | 4273-024-900. The legal description for the Subject<br>Property is as follows: EAST SANTA MONICA LOTS   |
|                                | 2,3,4,5,6,13,14,15,16 AND 17 AND EX OF ST LOTS  |
|                                | 1,7,8,9,10,11,12 AND LOT 18 BLK 43.   |
|                                | Based on the historical review, the Subject Property was  |
|                                | also identified as 2355, 2415, 2417 and 2501 16th Street;   |
|                                | 2416 and 2418 17th Street; 1638 and 1668 Pearl Street;  |
|                                | and 1655 Ocean Park Boulevard. These addresses were   |
|                                | also assessed/researched herein.  |
| Zoning Information             | According to the City of Santa Monica Planning  |
|                                | Department, the zoning for the Subject Property is PL,  |
|                                | which is defined as Institutional/Public Lands.   |
| Property Characteristics       | The Subject Property is a rectangular-shaped parcel   |
|                                | consisting of approximately 11 acres. The Subject   |
|                                | Property is generally level. A educational complex  |
|                                | occupies the north portion of the Subject Property,   |
| L                              | including classroom and administrative buildings, an  |

| Item                                 | Comment  |
|--------------------------------------|--|
|                                      | auditorium, a gymnasium, and a cafeteria.  |
|                                      | Asphalt paved parking spaces are located within the<br>northeast portion of the complex, adjoining a pre-school<br>facility. A landscaped area adjoins the auditorium building<br>along Pearl Street (north) and the northwestern<br>classroom/administrative buildings along 16th Street.   |
|                                      | The south portion of the parcel contains athletic fields and<br>ball courts, as well as an additional classroom building<br>and a clubhouse with an asphalt paved parking lot on the<br>southwest.   |
|                                      | A campus schematic is provided in Appendix F.  |
| Description of Property Structure(s) | John Adams Middle School includes 17 buildings. The<br>structures comprising the classroom/administrative<br>compound (Rooms 10 through 57) on the northwest<br>portion of the Subject Property are connected by arcades<br>and concrete-paved walkways. Classroom facilities on<br>this portion of the campus include science labs and<br>pertinent storage spaces. Restrooms and custodial rooms<br>adjoin the classrooms and offices. A library is near the<br>central-west Subject Property line along 16th Street.                                |
|                                      | Additional classrooms on the central-northeast portion of<br>the campus (Rooms 70 through 86) are adjoined by a<br>preschool facility on the north, and by a cafeteria and<br>kitchen on the south. A trash area is located on the<br>northeast exterior of the cafeteria on 17th Street (east).<br>The auditorium building along Pearl Street is the only<br>two-story structure on campus. It features audience<br>seating areas, practice/recording rooms, and storage<br>spaces. An elevator is located near the approximate<br>auditorium center. |
|                                      | The gymnasium at the approximate Subject Property center features locker rooms, as well as custodial spaces and restrooms. The structure is adjoined by ball courts on the south, and by athletic fields on the southeast. The   |

## 3.0 User Provided Information & Responsibilities

#### 3.1 Requested Documents and Information

The ASTM E1527-13/-21 specifies that the User, Santa Monica-Malibu Unified School District, provide any helpful documents that may be available as listed below.

- Environmental site assessment or environmental compliance audit reports
- Environmental permits or hazardous waste generator notices/reports
- Registrations for aboveground and underground storage tanks
  Septic systems, oil wells, or water wells
- Registrations for underground injection systems
- · Safety Data Sheets; Community Right to Know Plans; Safety, Preparedness and Prevention Plans; or Spill Protection Countermeasures and Control Plans
- Reports regarding hydrologic conditions on the Subject Property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Subject Property or relating to environmental liens encumbering the Subject Property.
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded Activity Use Limitations (AULs)
- Proceedings regarding hazardous substances and petroleum products including any pending, threatened or past: litigation; administrative proceedings; or notices from any governmental entity regarding possible violations of environmental laws or other possible liability related to hazardous substances or petroleum products.

The following information was provided by the User.

Phase I Environmental Site Assessment Report, Converse Consultants (Converse), January 2018 - Based on the age of the Subject Property buildings, Converse recommended to develop a Work Plan to address lead-base paint concerns in the shallow soils of the project area of the auditorium building, which was to be redeveloped at the time of the assessment. Converse further recommended all asbestos, PCBs and LBP building materials be identified and abated prior to demolition and redevelopment activities.

Modernization and Site Improvements Project, Mitigated Negative Declaration (MND), PBS & J. April 2010 - No new or significant impacts were identified as a result of the changes to the Proposed Project. No significant environmental impact was identified; recirculation of the MND was not required.

Auditorium Replacement Project, Mitigated Negative Declaration (MND), Dudek, March 2018 - No significant impacts were identified as a result of the auditorium replacement project.

Geoseismic/Geotechnical Investigation Report for Proposed New Buildings and Modernization Project, Converse Consultants, October 2008 - The site was deemed suitable from a geotechnical standpoint, based on field investigations, laboratory testing, geologic evaluation, and geotechnical analysis. Supplemental earthwork was recommended in May of 2009 for Buildings E, F, and G (Overexcavation).

Historical Resource Evaluation Report for the Auditorium Replacement Project, Dudek, February 2018 - The John Adams Middle School auditorium and music buildings were found not eligible under all National Register of Historic Places (NRHP), California Register of Historical Resources (CRHR), and City of Santa Monica designation criteria.

The historic core campus of the John Adams Middle School was considered a historical resource.

John Adams Middle School Historical Resource Inventory Report, Historical Resources Group, January 2022 - A potential historic district was identified at John Adams Middle School that is eligible for listing in the California Register of Historical Resources.

Sewer Inspection Report, Advanced Sewer Technologies, December 2009 - No environmental concerns were noted.

#### 3.2 User Provided Information

Section 6 of ASTM E1527-13/-21 outlines specific User's responsibilities. This information will help identify the possibility of RECs in connection with the Subject Property. The ASTM Standard provides a questionnaire to help the User to comply with the statutory requirements to perform tasks which would help identify RECs. In general, any Users should make Converse aware of information they have regarding the following:

- Environmental Cleanup Liens filed or recorded against the Subject Property
- Activity and land use limitations that are in place on the Subject Property or have been filed or recorded in a registry.
- Specialized knowledge or experience of the person seeking to qualify for the Legal Liability Protections (LLP)
- Relationship of the purchase price to fair market value of the Subject Property if it were not contaminated
- Commonly known or reasonably ascertainable information about the Subject
  Property
- The degree or obviousness of the presence or likely presence of contamination at the Subject Property, and the ability to detect this contamination by appropriate investigation.

The following information was requested from the User.

#### 3.2.1 Environmental Cleanup Liens

The User did not have any information regarding environmental cleanup liens.

#### 3.2.2 Activity and Use Limitations

The User did not have any information indicating they were aware of any AULs.

#### 3.2.3 Specialized Knowledge or Experience

The User did not provide any information indicating they had specialized knowledge or experience related to the Subject Property or nearby property.

#### 3.2.4 Reason for Significantly Lower Purchase Price

The User has not indicated to Converse that there is any conclusion that there was a lower purchase price because of known or suspected contamination at the Subject Property.

#### 3.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not have any information about past uses, specific chemicals at the Subject Property, past spills, environmental cleanup or other reasonably ascertainable information regarding the Subject Property.

#### 3.2.6 Obviousness of Contamination

The User did not have any information based on their knowledge or experience that would be obvious indicators of contamination on the Subject Property.

Unless specifically stated otherwise in the Scope of Services, the purpose of this Phase I ESA was to qualify for the landowner liability protections to CERCLA Liability as described in ASTM E1527-13/-21.

Business risk unrelated to the CERCLA innocent landowners defense are only assessed as specifically agreed in the Scope of Services and discussed in Section 12.0, Additional Non-Scope Services, of this report.

#### 3.3 Continuing Obligations

In order to assert a LLP, the User must satisfy a number of statutory requirements that are generally referred to as Continuing Obligations, which are outside the Scope of Services of the Phase I ESA. Examples of Continuing Obligations include providing legally required notices, stopping continuing releases and complying with land use restrictions. Failure to comply with these and other statutory post-acquisition requirements will jeopardize liability protection.

It is the responsibility of the User to comply with the Continuing Obligations requirements of ASTM E1527-13/-21 and AAI. Anyone seeking LLP protections should take independent action beyond this Phase I ESA to perfect their position.

## **4.0 Owner Provided Information**

The ASTM E1527-13/-21 specifies that the Subject Property owner and the Key Site Manager provide any helpful documents that may be available as listed below.

- · Environmental site assessment or environmental compliance audit reports
- Environmental permits or hazardous waste generator notices/reports
- Registrations for aboveground and underground storage tanks
- Septic systems, oil wells, or water wells
- Registrations for underground injection systems
- Safety Data Sheets; Community Right to Know Plans; Safety, Preparedness and Prevention Plans; or Spill Protection Countermeasures and Control Plans
- Reports regarding hydrologic conditions on the Subject Property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Subject Property or relating to environmental liens encumbering the Subject Property.
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded AULs
- Proceedings regarding hazardous substances and petroleum products including any pending, threatened or past: litigation; administrative proceedings; or notices from any governmental entity regarding possible violations of environmental laws or other possible liability related to hazardous substances or petroleum products.

Please see Section 3.1, Requested Documents and Information.

## **5.0 Records Review**

### 5.1 Physical Setting

| Item                  | Comments  |
|-----------------------|---|
| Physical Setting:     | The Subject Property is located approximately 143 feet above mean sea     |
|                       | level with surface topography sloping towards the southwest (United       |
|                       | States Geological Survey [USGS] Topographic Map, Beverly Hills,           |
|                       | California, 2018).  |
| Geology:              | The Subject Property is underlain by older alluvium, lake, playa, and     |
|                       | terrace deposits (Division of Mines and Geology, Geologic Map of          |
|                       | California, 2015).  |
| Groundwater:          | The nearest groundwater well to the Subject Property is located           |
|                       | approximately 0.4-miles south-southeast of the Subject Property near      |
|                       | the intersection of 17th Street and Sunset Avenue. Los Angeles County,    |
|                       | Department of Public Works (DPW) well number 2539L was last               |
|                       | measured on October 22, 2018. At that time, the depth to groundwater      |
|                       | was recorded at 18 feet below grade. The groundwater surface elevation    |
|                       | was recorded at 8 feet above mean sea level (amsl).                       |
| Potable Water Supply: | Potable water is supplied by the City of Santa Monica. According to the   |
|                       | City's 2021 Annual Water Quality Report, the City of Santa Monica         |
|                       | currently obtains up to 75% of its water from local groundwater wells     |
|                       | within the City and in West Los Angeles. The City extracts its water from |
|                       | three sub-basins within the Santa Monica Basin (Charnock, Olympic,        |
|                       | and Arcadia Sub-basins). 25% of the drinking water is purchased from      |
|                       | Metropolitan Water District (MWD). MWD imports water from two             |
|                       | separate sources. One is the Colorado River water from Lake Havasu.       |
|                       | The second is from the State Water Project, which originates in the       |
|                       | Sacramento-San Joaquin Delta.   |

#### 5.2 Historical Review

#### 5.2.1 Aerial Photograph and Map Review

Available historical aerial photographs and maps, which were provided by Environmental Data Resources (EDR), were reviewed. A summary of the review is provided in the following table. Copies of the aerial photographs and maps are provided in Appendix D.

|                  | Historical Summary      |                        |                              |  |  |  |
|------------------|-------------------------|------------------------|------------------------------|--|--|--|
| Resource and     | Property                | Adjoining Properties   | General Vicinity             |  |  |  |

#### 5.2.4 Data Failure

Historical information regarding the Subject Property indicated the Subject Property was undeveloped land as early as 1894. Therefore, no historical data failure occurred during this assessment.

#### 5.2.5 Summary of Historical Property Use

Historically, from as early as 1894, the Subject Property was undeveloped land. From as early as 1938, the present day school campus was gradually developed, and by 1972, the Subject Property appeared in the general current configuration.

Historical campus features noted on Fire Insurance Maps between 1950 and 1986 included woodworking and sheet metal shops, as well as associated transformers on the central-north portion of the Subject Property.

#### 5.2.6 Summary of Past Uses of Adjoining Properties

As early as 1894, the adjoining properties were undeveloped land. From as early as 1902, residential uses were noted on adjoining properties. By 1938, commercial-type structures were evident on adjoining properties.

Between 1950 and 1967, one (1) historical gas station was noted across the street form the southeast Subject Property corner, and another historical gas station was noted across the street from the southwest Subject Property corner.

Historical city directory entries between 1948 and 2009 included a south adjacent drycleaner across Ocean Park Boulevard (1618 Ocean Park Boulevard).

Recent aerial photographs indicate that adjacent properties remain for residential and commercial uses.

#### 5.2.7 Summary of Past Uses of the Surrounding Area

Residential uses were evident in the surrounding area from as early as 1894. By 1924, commercial uses were evident, which included a municipal airport to the far east-northeast by 1934.

Agricultural uses were noted in 1938, which were no longer evident by 1950.

Current aerial photographs indicated that the surrounding properties remain for residential and commercial uses.

#### 5.3 Results of Environmental Records Sources Review

An EDR report of Standard Environmental Record Sources (Records) was prepared specifically for the Subject Property. The search included queries to the following databases for cases within specified ASTM search distances. A copy of the database report is provided in Appendix E.

5.3.1 Property Listings

The Subject Property was listed on the following databases:

|            | Property Listings                     |
|------------|---------------------------------------|
| Site Name: | JOHN ADAMS MIDDLE SCHOOL              |
| Databases: | ECHO                                  |
| Address:   | 2425 16TH ST                          |
| Comments:  | No environmental concerns identified. |

| Comments:  | No violations.                 |  |

The historical south adjacent dry cleaner across Ocean Park Boulevard is an environmental concern that does not rise to the level of a REC based on no regulatory release or cleanup record and non-contiguous location.

The west adjacent diesel UST across 16th Street is not a REC based on no release records and regulatory review.

#### 5.3.3 Other Off-site Locations of Concern

Other off-site locations of concern identified by EDR within a maximum one-mile radius from the Subject Property included registered UST sites, LUST sites, hazardous waste generators, permitted hazardous materials handlers, and EDR Hist Auto, EDR Hist Cleaner, RCRA NON GEN/NLR, DRYCLEANERS, HAZNET, HWTS, EMI, FINDS, ECHO, Notify 65, HIST UST, CHMIRS, SEMS-ARCHIVE, SWEEPS UST, Cortese, HIST CORTESE, CERS, ENVIROSTOR, CERS HAZ WASTE, CERS TANKS, NPDES, LA Co. Site Mitigation, CIWQS, VCP, FUDS, CPS-SLIC, DEED, SCH and ENF database listings.

The potential for environmental concern to the Subject Property from these off-site locations appears to be low due to one or more of the following: type of regulatory listing; type of resource (soil) affected, distance from the Subject Property; status of the case; remedial efforts being directed by a regulatory agency; and/or potential responsible parties have been identified.

#### 5.3.4 Orphan Listings

The EDR database report identified one (1) orphan listing. The listing was located approximately 1.2-miles to the northeast of the Subject Property and was not deemed a concern based on distance.

#### 5.4 Additional Environmental Record Sources

| i duorai Agonoloo     |   |  |  |
|-----------------------|---|--|--|
| Source                | Comments  |  |  |
| U.S. Department of    | The PHMSA online mapping system for gas transmission pipelines an         |  |  |
| Transportation,       | hazardous liquid pipelines on the Subject Property or adjacent properties |  |  |
| Pipeline and          | was reviewed (https://www.npms.phmsa.dot.gov/PublicViewer/). No           |  |  |
| Hazardous Material    | pipelines were identified on or adjoining the Subject Property. A crude   |  |  |
| Safety Administration | oil pipeline was identified approximately 0.36-miles to the northeast a   |  |  |
| (PHMSA)               | Ocean Park Boulevard and 23rd Street.                                     |  |  |

|----------------------|---|
| Source               | Comments  |
| California           | No information regarding the Subject Property was on file with DTSC.    |
| Environmental        |   |
| Protection Agency    | The Envirostor website (http://www.envirostor.dtsc.ca.gov/public/) was  |
| (Cal/EPA) Department | reviewed for information, and the following information was on file     |
| of Toxic Substances  | regarding the Subject Property.   |
| Control (DTSC)       |   |
|                      | According to a September 2019 Preliminary Endangerment Assessment       |
|                      | (PEA), an approximately 1-acre area on the north-central portion of the |
|                      | school campus along Pearl Street was considered to be contaminated      |
|                      | with lead from lead-based paint, polychlorinated biphenyls (PCBs) from  |
|                      | building materials and organochlorine pesticides (OCPs) from            |
|                      | termiticides application, based on the age of former on-site buildings. |
|                      | Following soil sampling, limited hot spot housekeeping of lead impacted |
|                      | soil around identified lead-impacted locations was recommended.         |
|                      |   |
|                      | On August 13, 2019, the Santa Monica - Malibu Unified School District   |
|                      | (District) submitted a Subsurface Investigation (SSI) Report (Limited   |
|                      | Lead-Impacted Soil Housekeeping Activities). The SSI concluded that     |
|                      | approximately 10.5 cubic yards of lead contaminated soil in excess of   |
|                      | the screening level of 80 mg/kg had been excavated and shipped offsite  |
|                      | and recommended no further action.                                      |
|                      |   |

#### State Agencies

| Source                | Comments   |  |  |  |
|-----------------------|--|--|--|--|
|                       | In addition, the Santa Monica - Malibu Unified School District (District)  |  |  |  |
|                       | notified DTSC on September 23, 2019, that it had complied with all   |  |  |  |
|                       | public review and comment requirements for the PEA. The District had   |  |  |  |
|                       | made the PEA available for public review and comment from July 31,   |  |  |  |
|                       | 2019 through August 30, 2019 and a public hearing was held on August   |  |  |  |
|                       | 15, 2019. No public comments were received regarding the PEA.  |  |  |  |
|                       | Based on review of the PEA and the SSI, neither a release of hazardous   |  |  |  |
|                       | material nor the presence of a naturally occurring hazardous material,   |  |  |  |
|                       | which would pose a threat to public health or the environment under  |  |  |  |
|                       | unrestricted land use, was indicated. Therefore, DTSC concurred with   |  |  |  |
|                       | the conclusion of the SSI that further environmental investigation is not  |  |  |  |
|                       | required and approved the PEA and SSI.   |  |  |  |
| Cal/EPA, Regional     | The following information was on file regarding construction activities  |  |  |  |
| Water Quality Control | and associated runoff control measures at the Subject Property.  |  |  |  |
| Board (RWQCB)         |  |  |  |  |
|                       | Notices of Intent by the owner (Santa Monica-Malibu Unified School   |  |  |  |
|                       | District) regarding construction projects, including a new two-story   |  |  |  |
|                       | building, as well as modernization work on campus.   |  |  |  |
|                       | Supporting documentation included an October 2020 drive-by inspection record of construction activity on a new performing arts complex on the north portion of the Subject Property. Sediment runoff control was observed. Violation noted regarding annual reporting. |  |  |  |
|                       | The pertinent 2019-2022 Annual Reports for Storm Water Discharges associated with Construction Activity were provided by the RWQCB.  |  |  |  |
|                       | The Geotracker website (http://geotracker.waterboards.ca.gov/) was reviewed for information, and the Subject Property was not listed in the database.  |  |  |  |
| California Department | Converse reviewed the DOC CalGEM Online Well Finder  |  |  |  |
| of Conservation,      | (https://www.conservation.ca.gov/calgem/Pages/Wellfinder.aspx).  |  |  |  |
| California Department | According to the website, no oil or gas wells are located on or adjoining  |  |  |  |
| of Conservation       | the Subject Property. The Subject Property is not located within an oil  |  |  |  |
| (DOC),                | field.   |  |  |  |

## 6.0 Property Reconnaissance

#### 6.1 Methodology

On January 27, 2022 Converse visited the Subject Property to evaluate present use and to identify observable environmental conditions at the Subject Property. Our methodology involved walking the perimeters, center lines, and accessible interior areas of the buildings while noting observed evidence of present and potential environmental concerns.

A field-generated map is provided in Appendix B. Pertinent Subject Property photographs are provided in Appendix C.

#### 6.2 Limiting Conditions

Converse's findings are based on the Subject Property conditions observed on January 27, 2022.

#### 6.3 Interior Observations of Property

During our Subject Property visit, Converse made the following observations of the interior of the Subject Property's buildings:

| Interior Observations of Property |           |   |  |
|-----------------------------------|-----------|---|--|
| Item or Condition                 | Observed  | Comments  |  |
|                                   | Evidence? |   |  |
| Hazardous Substances &            | Yes       | Typical cleaning supplies observed in one-pint to     |  |
| Petroleum Products:               |           | five-gallon containers inside custodial storage       |  |
|                                   |           | spaces included floor cleaners and multi-purpose      |  |
|                                   |           | cleaners, disinfectants, floor wax/polish, concrete   |  |
|                                   |           | sealer, floor stripper, and detergents.               |  |
|                                   |           | Minor floor staining was observed on vinyl floor tile |  |
|                                   |           | inside the custodial room on the west side of the     |  |
|                                   |           | gymnasium building. No floor staining was noted in    |  |
|                                   |           | custodial spaces in the classroom/administrative      |  |
|                                   |           | buildings on the northwest portion of the Subject     |  |
|                                   |           | Property.   |  |
|                                   |           | Miscellaneous paints were stored in one-gallon to     |  |
|                                   |           | five-gallon containers inside an electrical room      |  |
|                                   |           | (Room 76) near the pre-school facility on the         |  |
|                                   |           | northeast portion of the Subject Property. Minor      |  |
|                                   |           | staining was noted on the concrete floor.             |  |

| Item or Condition           | Observed  | Comments  |
|-----------------------------|-----------|---|
|                             | Evidence? |   |
|                             |           |   |
|                             |           | Typical laboratory chemicals stored adjacent to     |
|                             |           | science classrooms on the central-west portion of   |
|                             |           | the campus included potassium permanganate and      |
|                             |           | clear ammonia in one-pint to one-gallon containers. |
|                             |           | No floor staining noted.                            |
| Storage Tanks & Related     | No        |   |
| Equipment:                  |           |   |
| Odors:                      | No        |   |
| Standing Surface Water or   | No        |   |
| Other Pools of Liquid:      |           |   |
| Drums & Other Containers    | Yes       | Please see Hazardous Substances & Petroleum         |
| of Hazardous Substances,    |           | Products above.                                     |
| Petroleum Products, or      |           |   |
| Other Unidentified          |           |   |
| Contents:                   |           |   |
| Transformers or Equipment   | No        |   |
| containing Polychlorinated  |           |   |
| Biphenyls (PCBs):           |           |   |
| Heating/Cooling System:     | Yes       | Pad mounted units on building exteriors.            |
| Stains or Corrosion on      | No        |   |
| Floors, Walls, or Ceilings: |           |   |
| Drains and Sumps:           | Yes       | Floor drains/sinks were observed in custodial and   |
|                             |           | kitchen spaces.                                     |

Converse noted the following:

Water softening equipment, including a cylindrical softener tank was located inside the kitchen space of the cafeteria building on the central-east portion of the Subject Property.

HVAC equipment was observed inside a mechanical room adjoining the library on the central-west portion of the Subject Property.

Minor water staining was evident on acoustic ceiling tiles at multiple locations throughout the educational complex. No evidence of mold growth noted.

#### 6.4 Exterior Observations of Property

During our Subject Property visit, Converse made the following observations of the exterior of the Subject Property:

| Exterior Observations          |           |          |
|--------------------------------|-----------|----------|
| Item or Condition              | Observed  | Comments |
|                                | Evidence? |          |
| Hazardous Substances &         | No        |          |
| Petroleum Products:            |           |          |
| Storage Tanks & Related        | No        |          |
| Equipment:                     |           |          |
| Odors:                         | No        |          |
| Standing Surface Water or      | No        |          |
| Other Pools of Liquid:         |           |          |
| Drums & Other Containers       | No        |          |
| of Hazardous Substances,       |           |          |
| Petroleum Products, or         |           |          |
| Other Unidentified             |           |          |
| Contents:                      |           |          |
| Transformers or Equipment      | No        |          |
| containing Polychlorinated     |           |          |
| Biphenyls (PCBs):              |           |          |
| Pits, Ponds, or Lagoons:       | No        |          |
| Stained Soil or Pavement:      | No        |          |
| Stressed Vegetation (other     | No        |          |
| than from insufficient         |           |          |
| water):                        |           |          |
| Evidence of Mounds,            | No        |          |
| Depressions or Filled or       |           |          |
| Graded Areas Suggesting        |           |          |

| Disposal:                      |           |          |
| Waste Water or any             | No        |          |
| discharge (including storm     |           |          |
| water) into a Drain, Ditch, or |           |          |
| Stream on or Adjacent to       |           |          |
| the Property:                  |           |          |
| Wells (active, inactive, or    | No        |          |
| abandoned):                    |           |          |
| Septic Systems or              | No        |          |
| Cesspools:                     |           |          |
| Prior Structures:              | No        |          |

| Item or Condition       | Observed  | Comments  |
|-------------------------|-----------|---|
|                         | Evidence? |   |
| Roads, Tracks, Railroad | Yes       | Pearl Street adjoins the Subject Property on the      |
| Tracks or Spurs:        |           | north; Ocean Park Boulevard adjoins the Subject       |
|                         |           | Property on the south; 17th Street adjoins the        |
|                         |           | Subject Property on the east; and 16th Street adjoins |
|                         |           | the Subject Property on the west.                     |

Converse observed the following:

Antenna equipment was located south of the auditorium building.

Pad-mounted, utility owned (Southern California Edison) transformer equipment was observed on the northeast Subject Property portion, south adjacent to the auditorium building; and on the north exterior of the clubhouse building on the southwest portion of the Subject Property. No staining was on the concrete/asphalt around the transformers.

Pole-mounted, utility owned (Southern California Edison) transformer equipment was observed along the east adjoining 17th Street and the west adjoining 16th Street, respectively (offsite). No staining was on the concrete/asphalt/soil below the equipment. The pertinent power lines were labeled as 16 kilovolts at eyelevel on the poles.

### 6.5 Current Uses of Adjoining Properties

Based on our research and observations during our Subject Property visit, the Subject Property is bordered by the following:

|           | Adjoining Property Use   |  |  |
|-----------|--|--|--|
| Direction | Current Development  |  |  |
| North     | Pearl Street, followed by Santa Monica Community College (2225 Pearl     |  |  |
|           | Street).   |  |  |
| Northeast | Pearl Street, followed by Santa Monica Community College (2225 Pearl     |  |  |
|           | Street).   |  |  |
| Northwest | Pearl Street, followed by residential property (1525 Pearl Street).      |  |  |
| South     | Ocean Park Boulevard, followed by commercial property, including         |  |  |
|           | restaurants, grocery/retail stores, and offices (1600 to 1650 Ocean Park |  |  |
|           | Boulevard).  |  |  |
| Southeast | Ocean Park Boulevard and 17th Street, followed by Yogaurt (1700 Ocean    |  |  |
|           | Park Boulevard).   |  |  |
| Southwest | Ocean Park Boulevard and 16th Street, followed by a Plant Nursery (2612  |  |  |
|           | 16th Street).  |  |  |

| Direction | Current Development  |
|-----------|--|
| East      | 17th Street, followed by (north to south) a church (1702 17th Street),         |
|           | single-family homes (1701 & 1702 Cedar Street, 1703 & 1702 Pine Street,        |
|           | and 1703 & 1702 Maple Street), and Thrifty Wash (2521 Ocean Park               |
|           | Boulevard).  |
| West      | 16th Street, followed by (north to south) a church (2304 16th Street),         |
|           | multi-family residential property (2318 & 2326 16th Street), Will Rogers       |
|           | Elementary School (2401 14th Street), residential property (2512 16th Street), |
|           | and Frontier Communications (1515 Ocean Park Boulevard).                       |

### 6.6 Current Uses of Surrounding Area

Based on our research and observations during our Subject Property visit, the surrounding area of the Subject Property consists of residential and commercial uses. Commercial uses include restaurants, retail stores, offices, churches, and auto repair shops.

# 7.0 Interviews

During the interviews, the owners and occupants were asked if they had any available documents that would be helpful. The documents that were requested are detailed in Section 4.0 of this report:

| Interview:        | Comments:  |
|-------------------|--|
| Property Owner:   | According to Mr. Julian F. Capata of Santa Monica-Malibu Unified         |
|                   | School District (SMMUSD), the Subject Property has been a middle         |
|                   | school since the 1930s. Mr. Capata advised that asbestos and             |
|                   | lead-based paint were known to have been present at the Subject          |
|                   | Property, which were addressed during previous campus redevelopment      |
|                   | activities, as indicated in pertinent documentation provided by SMMUSD   |
|                   | (see Sections 3.1 and 5.4).  |
| Tenant/ Occupant: | The Property is owner-occupied.  |
| State or Local    | Other than the information provided in Section 5.4, no other information |
| Government        | was provided by a government official.                                   |
| Officials:        |  |
| Owners and        | No interviews of owners or occupants of neighboring sites were           |
| Occupants of      | conducted.   |
| Neighboring       |  |
| Sites:            |  |

# 8.0 Findings

A cursory summary of findings is provided below. However, details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

- The Subject Property is owned by the Santa Monica-Malibu Unified School District, and is operated as John Adams Middle School.
- Based on the historical review, the Subject Property was also identified as 2355, 2415, 2417 and 2501 16th Street; 2416 and 2418 17th Street; 1638 and 1668 Pearl Street; and 1655 Ocean Park Boulevard. These addresses were also assessed/researched herein.
- Historically, from as early as 1894, the Subject Property was undeveloped land. From as early as 1938, the present day school campus was gradually developed, and by 1972, the Subject Property appeared in the general current configuration. Historical campus features noted on Fire Insurance Maps between 1950 and 1986 included woodworking and sheet metal shops, as well as associated transformers on the central-north portion of the Subject Property.
- The Subject Property was listed on the RCRA NonGen / NLR, ECHO, FINDS, HWTS, HAZNET, CIWQS, SCH, NPDES, HWTS, HAZNET, CERS and ENVIROSTOR Manifested wastes included asbestos-containing waste, waste oil databases. (approximately two-gallons), surplus organics, laboratory waste chemicals (detergent and soap). In 2012, approximately 50 tons of contaminated soil from site cleanup were manifested. Approximately 0.6 tons of polychlorinated biphenyls (PCBs) and material containing PCBs were manifested in 1994/1995. Department of Toxic Substances Control (DTSC) issued a No Further Action determination as of September 25, 2019, regarding lead contaminated soil in excess of the screening level of 80 mg/kg which was excavated at the north portion of the school campus. Based on review of the pertinent Preliminary Endangerment Assessment (PEA) and the Subsurface Investigation (SSI), neither a release of hazardous material nor the presence of a naturally occurring hazardous material, which would pose a threat to public health or the environment under unrestricted land use, was indicated. Therefore, DTSC concurred with the conclusion of the SSI that further environmental investigation is not required and approved the PEA and SSI.
- Based on review of historical information and the Department of Toxic Substances Control (DTSC) Guidance on school site evaluation, soil sampling with regards to lead from lead-base paint is recommended for all on-site structures built prior to 1994. Soil sampling with regards to organochlorine pesticides from termiticide application is recommended for all on-site structures built prior to 1989. This excludes auditorium/performing arts complex additions in the recent past, as well as the clubhouse building which was installed after 1994.
- As early as 1894, the adjoining properties were undeveloped land. From as early as 1902, residential uses were noted on adjoining properties. By 1938, commercial-type structures were evident on adjoining properties. Between 1950 and 1967, one (1) historical gas station was noted across the street from the southeast Subject Property corner, and another historical gas station was noted across the street from the southwest Subject Property corner. Historical city directory entries between 1948 and 2009 included a south adjacent drycleaner across Ocean Park Boulevard (1618 Ocean Park Boulevard).
- The adjoining properties were listed on the EMI, ECHO, FINDS, RCRA-SQG, RCRA NON GEN/NLR, SWEEPS UST, CA FID UST, DRYCLEANERS, Hist Cleaners, and UST databases. One (1), 4,000-gallon diesel UST, permitted with the City of Santa Monica Fire Department, was identified at a west adjacent property across 16th Street. Tetrachloroethene use was permitted at a south adjacent historical drycleaner site across Ocean Park Boulevard between 1957 and 1999.
- The surrounding area of the Subject Property consists of residential and commercial uses. Commercial uses include restaurants, retail stores, offices, churches, and auto repair shops.

• No significant data gaps were identified throughout the assessment.

# 9.0 Opinion

Current and historical Subject Property uses as a school are not RECs.

Based on review of historical information and the Department of Toxic Substances Control (DTSC) Guidance on school site evaluation, soil sampling with regards to lead from lead-base paint is recommended for all on-site structures built prior to 1994. Soil sampling with regards to organochlorine pesticides from termiticide application is recommended for all on-site structures built prior to 1989. This excludes auditorium/performing arts complex additions in the recent past, as well as the clubhouse building which was installed after 1994.

Regulatory database listings for the Subject Property are not a REC based on completed remediation activities under regulatory oversight, regulatory closure, offsite disposal and site use.

The historical south adjacent dry cleaner across Ocean Park Boulevard is an environmental concern that does not rise to the level of a REC based on no regulatory release or cleanup record and non-contiguous location.

The west adjacent diesel UST across 16th Street is not a REC based on no release records and regulatory review.

The east adjacent historical gas station across 17th Street, and the west adjacent historical gas station across 16th Street are not RECs based on lack of release records, non-contiguous location, and redevelopment.

No significant data gaps were identified that affect the ability of the Environmental Professional (EP) to identify RECs.

No CRECs or HRECs were identified during the assessment.

There are no unusual circumstances where greater certainty is required regarding RECs.

### **10.0 Conclusions and Recommendations**

Converse has performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E1527-13/-21 for John Adams Middle School at 2425 16th Street, Santa Monica, Los AngelesCounty, California. Any exceptions to or deletions from this practice are described in the Limitations and Exceptions of Assessment section of this report. This assessment has revealed no evidence of *recognized environmental conditions, controlled recognized environmental conditions,* or *significant data gaps* in connection with the Subject Property. However, further assessment is recommended based on the following environmental concerns that were identified:

• Based on review of historical information and the Department of Toxic Substances Control (DTSC) Guidance on school site evaluation, soil sampling with regards to lead from lead-base paint is recommended for all on-site structures built prior to 1994. Soil sampling with regards to organochlorine pesticides from termiticide application is recommended for all on-site structures built prior to 1989. This excludes auditorium/performing arts complex additions in the recent past, as well as the clubhouse building which was installed after 1994.

# **11.0 Deviations and Limitations**

No deviation(s) from the ASTM Standard Practice were encountered during this assessment.

### **12.0 Additional Non-Scope Services**

There are environmental issues outside the scope of the ASTM E1527-13/-21 that can be assessed in connection with a commercial real estate transaction. These are dealt with as non-scope considerations since they do not typically present a Superfund Liability. The specific level of inquiry (if any) is defined in the Proposal which contains a Scope of Work. These non-scope services are very client specific and not covered by the ASTM standard. They are frequently related to the business environmental risk which is defined in the standard as "risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate".

The following non-scope issues were addressed as required in the Scope of Work.

<u>Lead-Based Paints (LBPs)</u>: There is a potential that lead-based paints are located within the structures. No damaged, peeling or flaking paint was observed during the Subject Property reconnaissance. No Operations and Maintenance (O&M) Plan was provided to Converse. From review of historical aerial photographs, the majority of the on-site structures was built prior to 1994. Based on this information and the Department of Toxic Substances Control (DTSC) Guidance on school site evaluation, lead in soil is a concern for the Subject Property, and sampling is recommended. The clubhouse building, as well as recent auditorium additions were constructed after 1994, and therefore no soil sampling is recommended for these structure according to the DTSC Guidance on school site evaluation.

<u>Organochlorine Pesticides from Termiticide Application:</u> Based on the construction date of the majority of the on-site structures prior to 1989, soil sampling in the area of the structures is recommended in case of future renovation/demolition activities. The clubhouse building, as well as recent auditorium additions were constructed after January 1, 1989, and therefore no soil sampling is recommended for these structure according to the DTSC Guidance on school site evaluation.

#### Polychlorinated Biphenyls from Electrical Transformers:

Pad-mounted, utility owned (Southern California Edison) transformer equipment was observed on the northeast Subject Property portion, south adjacent to the auditorium building; and on the north exterior of the clubhouse building on the southwest portion of the Subject Property. No staining was on the concrete/asphalt around the transformers.

Pole-mounted, utility owned (Southern California Edison) transformer equipment was observed along the east adjoining 17th Street and the west adjoining 16th Street, respectively. The pole-mounted transformers are located off-site, and no ground surface staining was noted around the equipment.

### **13.0 Signature of Environmental Professional**

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

I have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

Norman S. Eke Senior Vice President/Managing Officer

This Phase I ESA was completed by the above Environmental Professional. A complete list of preparers, and their responsibilities for this assessment, is provided in the following section (Section 14.0, List of Preparers).

### 14.0 List of Preparers

Norman S. Eke Senior Vice President

B.A., Liberal Studies, Environmental Studies Emphasis, University of California, Santa Barbara, 1988. Cal/OSHA Certified Asbestos Consultant, #96-2093 NIOSH 582 Equivalent Training

Senior Vice President and Managing Officer of Converse's California Environmental offices. Mr. Eke has served as the Principal-in-Charge and Contract Administrator to deliver services to our public agency and private clients. Mr. Eke has 31 years of experience in the fields of Environmental Due Diligence including Phase I and Phase II Environmental Site Assessments, Asbestos surveys/specifications/abatement monitoring, Preliminary Endangerment Assessments and associated Supplemental Site Investigations and Removal Action Work Plans/Implementation, various forms of Remediation, Human Health Risk Assessment and Indoor Air Quality. Mr. Eke is a former Subcommittee Chairman for E.50-02 Real Assessment and Management of the ASTM E.50 Committee on Environmental Assessment, Risk Management, Corrective Action, which includes Phase I ESA standards.

Principal area of responsibility for this ESA report: Historical Research, Regulatory Agency Interaction, Property Reconnaissance, Interviews, and Report Generation, Project Management, Report Review, and Client Point of Contact.

### Michael A. Van Fleet

Senior Geologist

B.S. Earth Science, University of California, Santa Cruz, 1999 Professional Geologist; California No. 7869, Washington No. 2900

Mr. Van Fleet has over 21 years of experience working as a geologist in the states of California and Washington. The majority of his project experience has been in the areas of environmental assessment and subsequent remediation, but also includes experience in groundwater development. Mr. Van Fleet's experience includes: collection of soil matrix, soil vapor, and groundwater samples; geologic logging of earth materials; designing well completion parameters; regulatory interaction; design and operation of soil vapor and groundwater remediation systems; staff and project management; report preparation and review; and monitoring of contractor activities.

Principal area of responsibility for this ESA report: Report Review.

### Kaspar Wittlinger

Senior Staff Environmental Scientist

B.S., Environmental Engineering, The City College of New York, New York, 2016 EIT Certificate #162789, Sacramento, CA

Mr. Wittlinger has 14 years of professional experience collaborating on international construction and site remediation projects. As an Engineer in Training he has resolved permitting issues in public spaces with strategic water and soil sample collection, pertaining data analysis, and presentation of recommendable courses of action. He has designed customized systems for water and soil best management practices. Mr. Wittlinger has experience conducting Environmental Site Assessments as part of the due diligence process.

Principal area of responsibility for this ESA report: Historical Research, Regulatory Agency Interaction, Property Reconnaissance, Interviews, and Report Generation.

### **EXECUTIVE SUMMARY**

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each ad dress, the directory lists the name of the corresponding occupant at five year intervals.

Bus iness directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2015. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

As ummary of the information obtained is provided in the text of this report.

### **RECORD SOURCES**

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Brad street. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

### **RESEARCH SUMMARY**

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Converse Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Converse Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

#### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed

data on individual sites can be reviewed.

Sites listed in *bold italics* are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/20/2021 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

#### Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

#### Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/22/2021 has revealed that there are 14 ENVIROSTOR sites within approximately 1 mile of the target property.

#### Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 10 LUST sites within approximately 0.5 miles of the target property.

#### Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

#### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

#### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 26 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 5 HIST CORTESE sites within approximately 0.5 miles of the target property.

#### EDR HIGH RISK HISTORICAL RECORDS

#### EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

|---------------------|------------------|-------------------------|--------|------|
| EDISON/SANTA MONICA | 819 COLORADO AVE | WNW 1/2 - 1 (0.973 mi.) | U95    | 390  |

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 7 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

|                 |  | CRA) program through the tracking of  |       |  |
|                 | events and activities related to facili    | ties that generate, transport.        |       |  |

Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

| EMS Map Link:<br>Eligibility:<br>Has Projects:<br>NPL Status:<br>Property History: | https://fudsportal.usace.army.mil/ems/ems/inventory/map/map?id=63176<br>Ineligible<br>No<br>Not on the NPL<br>The 86,160 square feet of land underlying the Santa Monica Housing<br>Project was leased by the Department of Interior on April 23, 1943<br>from the property owner, C. U. Whiffen. The subject site was used by<br>the War Relocation Authority (WRA) for temporary housing. In a letter<br>to the War Assets Administration (WAA), the WRA declared the<br>buildings and fixtures on the site surplus real property and<br>indicated that the site would be vacated between May 7, and May 15,<br>1946. The buildings and fixtures on the site were assigned to the WAA<br>for disposition. During the course of the research conducted for this<br>site, no information was obtained to indicate that it was ever owned<br>or operated by a DOD entity. |

Papermate currently working with the City of Santa Monica to implement remediation of soil contamination. The site consists of approximately 10 acres which includes four buildings. Building I is used for metal fabrication, assembly, and jparts molding processes. Building II is used for packaging, ink formulation, and additional product assembly. Building II is used for warehousing and packaging and Building IV is used for storage of machine parts and furniture. The site is entirely covered by buildings or pavement and completely fenced. In 1985 in response to the City of Santa Monica's require- ments RP tested the pressure of 18 USTs and excavated and removed VOC contaminated soil from the site. In Feb 1992 metal contaminated soil beneath the plating room floor of Building I was excavated and removed. In June 1993, six USTs were removed from the vicinity of Building I and soil contaminated with TPH was excavated and removed from the site. In August 1993 RP removed four USTs containing haz substances in the vicinity of Building II. Post removal soil samples indicated the presence of 1,2-dichloroethane 57 ug/kg, 1,1-dichloroethane 180 ug/kg, 1,1,1-trichloro- ethane 450 ug/kg, tetrachloroethene 100 ug/kg, trichloro- ethene 30 ug/kg, and 1,1-dichloroethene 440 ug/kg. The City of Santa Monica is currently working with Papermate to implement a remediation technique for the VOC contamin- ated soil in the vicinity of Building II. |   | Site History:                      | Since the third quarter of 2011, all groundwater monitoring reports  |       |
|   |                                    | for the Gillette site and vicinity can be found at the City of Santa   |       |
|   |                                    | Monica Corporation Yard case on Geotracker (a closed Water Board   |       |
|   |                                    | Case) - The City of Santa Monica Corporation Yard Geotracker Glob<br>ID is T0603799303. Through a Settlement Agreement the City of Sa      |       |
|   |                                    | Monica has legal responsibility for control and remediation of all   | inta  |
|   |                                    | contamination, originating from the Gillette site, now present in the  |       |
|   |                                    | B zone and C zone aquifers. As of the third quarter 2011, all  |       |
|   |                                    | required B, C, and deeper-zone groundwater monitoring activities fo  | or    |
|   |                                    | Gillettes Paper Mate facilities and the City of Santa Monicas  |       |
|   |                                    | Corporation Yard are conducted and reported by the City of Santa   |       |
|   |                                    | Monica. The City is required to monitor selected monitoring wells on   | 1     |
|   |                                    | the Gillette property as part of this groundwater monitoring program.  |       |
|   |                                    | The City of Santa Monicas quarterly monitoring reports will serve to   |       |
|   |                                    | replace the monitoring reports previously submitted separately by  |       |
|   |                                    | Gillette and the City of Santa Monica. Gillette Corporation  |       |
|   |                                    | (Gillette) is currently conducting shallow zone groundwater  |       |
|   |                                    | remediation at the Gillette site under specific requirements of a  |       |
|   |                                    | modified CAO. The former Paper Mate facility (Site) is located on  |       |
|   |                                    | 10.5 acres of land immediately north of Olympic Blvd. between Stew   |       |
|   |                                    | Street on the east and 26th Street to the west, in Santa Monica. This  | S     |
|   |                                    | area is designated as an Industrial Corridor by the City of Santa  |       |
|   |                                    | Monica. There are four main buildings (Building I through IV) covering approximately 295,000 square feet. The buildings are on tw          |       |
|   |                                    | adjacent properties. The northern property is currently owned by the   |       |
|   |                                    | Higgins Trusts (Higgins) and the southern property is currently owned  |       |
|   |                                    | by Hines 26th Street LLC (Hines). Buildings I, III, and IV are on the  | Ju    |
|   |                                    | Hines property and Building II is on the Higgins property. Prior to  |       |
|   |                                    | 2007, the Hines property was owned by the Stahl Trust (Stahl).   |       |
|   |                                    | PaperMate began operations at the Site in 1957, when they leased   |       |
|   |                                    | Building I from Stahl. In 1968, Building II was leased from Higgins.   |       |
|   |                                    | This was followed, in 1972, with the leasing of Building III from  |       |
|   |                                    | Stahl and, in 1982, with the leasing of Building IV from Stahl.  |       |
|   |                                    | Operations ended in 2006. Prior to the mid-1950s, the area near the  | ;     |
|   |                                    | site was used for clay quarrying and brick firing. After the clay  |       |
|   |                                    | quarries were depleted they were used as landfills by the Cities of  |       |
|   |                                    | Santa Monica and Beverly Hills. No records describing the material   |       |
|   |                                    | deposited in the landfill have been provided to the Regional Board.  |       |
|   |                                    | Regional Board staff believe, because these were city landfills, that  |       |
|   |                                    | the predominant material deposited in the landfills is local   | ha    |
|   |                                    | household and industrial solid waste. VOCs have been detected in t<br>subsurface soil, soil vapor, and groundwater underlying the Gillette | ne    |
|   |                                    | Site. In addition, VOCs have been detected in groundwater beneath  |       |
|   |                                    | Olympic Blvd., immediately south of the site. In 1957, Paper Mate  |       |
|   |                                    | began manufacturing operations in Building I. Operations included  |       |
|   |                                    | machining, electroplating, metal processing, degreasing, injection   |       |
|   |                                    | molding, and ink manufacturing. Hazardous materials and hazardou   | IS    |
|   |                                    | waste were also stored in and adjacent to Building I. Wastewater wa  |       |
|   |                                    | generated, treated and discharged to the sanitary sewer. Numerous  |       |
|   |                                    | underground and above ground tanks were used at Building I.  |       |
|   |                                    |  |       |

#### THE GILLETTE CO PAPER MATE GR (Continued)

Manufacturing operations began in Building II in 1968. Operations included extrusion of plastic pen parts, sintering and grinding, ink manufacturing, product assembly, nickel plating, and plant maintenance. Building III was first occupied by PaperMate in 1972. It was used for packaging, warehousing, and shipping products. In 1994, manufacturing began in Building III. Building III manufacturing included extrusion, molding, and assembly. Facility maintenance also occurred in the building. Chemicals used included hydraulic oil, lubricants, grease, fluid coolant, antifreeze, adhesives, primers, paints, cutting fluids. Hazardous materials were stored in designated areas within Building III. There were no ASTs or USTs near Building III. Industrial wastewater was not produced at Building III. Building IV was first occupied by Gillette in 1982. It was used for general storage and product storage. In 2002, operations ceased in Building II and equipment maintenance moved to Building IV. Maintenance involved rinsing processing equipment brought from other parts of the building. The equipment was rinsed with water, glycols, and n-propanol. The rinse liquid was handled as industrial wastewater. The hazardous materials noted above were stored in designated areas within Building IV. There were no ASTs or USTs near Building IV. Industrial wastewater was not produced at Building IV. Assessment activities have taken place intermittently since 1986. In Situ Thermal Treatment was used to remove VOCs from soil and shallow groundwater from December 2009 to December 2011. Focused soil excavation was conducted before and after the In Situ Thermal Treatment, to remove soil with more elevated VOC concentrations. Site contamination and the proximity of the Site to City of Santa Monica domestic water supply wells are the primary conditions requiring assessment and remediation. Site contamination includes PCE and TCE in shallow groundwater beneath the Site at concentrations as high as 21,000 a%g/L and 1,400 a%g/L, respectively. Deep groundwater beneath the Site is contaminated with TCE at concentrations as high as 979 a%g/L. There are significant sources of PCE and TCE in Site soil as indicated by detections of PCE and TCE in soil vapor at concentrations as high as 28,000 a%g/L and 4,904 a%g/L, respectively, and in soil at concentrations as high as 2,500,000 a%g/kg and 170 a%g/kg, respectively. There are three City of Santa Monica water supply wells near the site. Well SM-7 (not operating) is immediately south of the east end of the Site, well SM-4 is approximately 750 feet east of the Site, and well SM-3 is approximately 1600 feet east of the Site. Volatile organic compounds including PCE and TCE have been detected in the City of Santa Monica water supply wells. In a modified CAO, issued on November 10, 2010 acknowledged a Settlement and Release Agreement among the City of Santa Monica, The Gillette Company, and the Proctor & Gamble Company that specified their obligations, regarding the restoration and replacement of groundwater from the Olympic Sub-Basin, including funds to the City of Santa Monica from the Gillette Company for the extraction of impacted groundwater and the construction and operation of groundwater treatment facilities. The City of Santa Monica remains obliged to conclusively demonstrate capture of all Gillette contamination plumes (B and C Zone aquifers). On May 3, 2019, A "Soils Only" No Further Action (NFA) letter was issued to Gillette for the Building 2 location. The "Soils Only" NFA includes a Land Use Covenant/Deed Restriction.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

#### STANDARD ENVIRONMENTAL RECORDS

#### Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

EPA Region 9 Telephone: 415-947-4246

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/20/2021 Date Data Arrived at EDR: 11/05/2021 Date Made Active in Reports: 11/29/2021 Number of Days to Update: 24 Source: EPA Telephone: N/A Last EDR Contact: 12/29/2021 Next Scheduled EDR Contact: 04/11/2022 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

#### Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

#### Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021 Date Data Arrived at EDR: 06/24/2021 Date Made Active in Reports: 09/20/2021 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 703-603-8704 Last EDR Contact: 12/29/2021 Next Scheduled EDR Contact: 04/11/2022 Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/20/2021 Date Data Arrived at EDR: 11/05/2021 Date Made Active in Reports: 11/29/2021 Number of Days to Update: 24 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 12/01/2021 Next Scheduled EDR Contact: 01/24/2022 Data Release Frequency: Quarterly

#### Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/20/2021 Date Data Arrived at EDR: 11/05/2021 Date Made Active in Reports: 11/29/2021 Number of Days to Update: 24 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 12/01/2021 Next Scheduled EDR Contact: 01/24/2022 Data Release Frequency: Quarterly

#### Lists of Federal RCRA facilities undergoing Corrective Action

#### CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

#### Lists of Federal RCRA TSD facilities

#### RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/13/2021 Date Data Arrived at EDR: 09/15/2021 Date Made Active in Reports: 10/12/2021 Number of Days to Update: 27 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/17/2021 Next Scheduled EDR Contact: 04/04/2022 Data Release Frequency: Quarterly

#### Lists of Federal RCRA generators

#### RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/13/2021 Date Data Arrived at EDR: 09/15/2021 Date Made Active in Reports: 10/12/2021 Number of Days to Update: 27 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/17/2021 Next Scheduled EDR Contact: 04/04/2022 Data Release Frequency: Quarterly

#### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/13/2021 Date Data Arrived at EDR: 09/15/2021 Date Made Active in Reports: 10/12/2021 Number of Days to Update: 27 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/17/2021 Next Scheduled EDR Contact: 04/04/2022 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators) RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

#### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

#### Lists of state- and tribal hazardous waste facilities

#### ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 07/22/2021 Date Data Arrived at EDR: 07/22/2021 Date Made Active in Reports: 10/08/2021 Number of Days to Update: 78 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 10/26/2021 Next Scheduled EDR Contact: 02/07/2022 Data Release Frequency: Quarterly

#### Lists of state and tribal landfills and solid waste disposal facilities

#### SWF/LF (SWIS): Solid Waste Information System

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

### Lists of state and tribal brownfield sites

BROWNFIELDS: Considered Brownfieds Sites Listing

A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

Date of Government Version: 09/20/2021 Date Data Arrived at EDR: 09/21/2021 Date Made Active in Reports: 12/08/2021 Number of Days to Update: 78 Source: State Water Resources Control Board Telephone: 916-323-7905 Last EDR Contact: 12/16/2021 Next Scheduled EDR Contact: 04/04/2022 Data Release Frequency: Quarterly

### ADDITIONAL ENVIRONMENTAL RECORDS

### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/10/2021 Date Data Arrived at EDR: 06/10/2021 Date Made Active in Reports: 08/17/2021 Number of Days to Update: 68 Source: Environmental Protection Agency Telephone: 202-566-2777 Last EDR Contact: 12/08/2021 Next Scheduled EDR Contact: 03/28/2022 Data Release Frequency: Semi-Annually

### TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995 Date Data Arrived at EDR: 08/30/1995 Date Made Active in Reports: 09/26/1995 Number of Days to Update: 27 Source: State Water Resources Control Board Telephone: 916-227-4364 Last EDR Contact: 01/26/2009 Next Scheduled EDR Contact: 04/27/2009 Data Release Frequency: No Update Planned

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

### LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 10/20/2021 Date Data Arrived at EDR: 11/05/2021 Date Made Active in Reports: 11/29/2021 Number of Days to Update: 24 Source: Environmental Protection Agency Telephone: 202-564-6023 Last EDR Contact: 12/29/2021 Next Scheduled EDR Contact: 04/11/2022 Data Release Frequency: Semi-Annually

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 08/30/2021 Date Data Arrived at EDR: 08/31/2021 Date Made Active in Reports: 11/19/2021 Number of Days to Update: 80 Source: DTSC and SWRCB Telephone: 916-323-3400 Last EDR Contact: 11/30/2021 Next Scheduled EDR Contact: 03/14/2022 Data Release Frequency: Semi-Annually

### **Records of Emergency Release Reports**

#### Other Ascertainable Records

## RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

US FIN ASSUR: Financial Assurance Information

All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

Date of Government Version: 09/13/2021 Date Data Arrived at EDR: 09/15/2021 Date Made Active in Reports: 09/28/2021 Number of Days to Update: 13 Source: Environmental Protection Agency Telephone: 202-566-1917 Last EDR Contact: 12/17/2021 Next Scheduled EDR Contact: 04/04/2022 Data Release Frequency: Quarterly

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 11/01/2021 Next Scheduled EDR Contact: 02/14/2022 Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018 Number of Days to Update: 73 Source: Environmental Protection Agency Telephone: 703-308-4044 Last EDR Contact: 11/05/2021 Next Scheduled EDR Contact: 02/14/2022 Data Release Frequency: Varies

### TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2016 Date Data Arrived at EDR: 06/17/2020 Date Made Active in Reports: 09/10/2020 Number of Days to Update: 85 Source: EPA Telephone: 202-260-5521 Last EDR Contact: 12/17/2021 Next Scheduled EDR Contact: 03/28/2022 Data Release Frequency: Every 4 Years

TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2018 Date Data Arrived at EDR: 08/14/2020 Date Made Active in Reports: 11/04/2020 Number of Days to Update: 82 Source: EPA Telephone: 202-566-0250 Last EDR Contact: 11/16/2021 Next Scheduled EDR Contact: 02/28/2022 Data Release Frequency: Annually

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 10/20/2021 Date Data Arrived at EDR: 11/05/2021 Date Made Active in Reports: 11/12/2021 Number of Days to Update: 7 Source: Environmental Protection Agency Telephone: 202-564-8600 Last EDR Contact: 10/18/2021 Next Scheduled EDR Contact: 01/31/2022 Data Release Frequency: Varies

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

| UMTRA: Uranium Mill Tailings Sites   | <b>, , , , , , , , , , , , , , , , , , , </b>   |
|  | es for federal government use in national defense programs. When the mills  |

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Financial Assurance 2: Financial Assurance Information Listing

A listing of financial assurance information for solid waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

Date of Government Version: 08/13/2021 Date Data Arrived at EDR: 08/13/2021 Date Made Active in Reports: 11/05/2021 Number of Days to Update: 84 Source: California Integrated Waste Management Board Telephone: 916-341-6066 Last EDR Contact: 11/16/2021 Next Scheduled EDR Contact: 02/21/2022 Data Release Frequency: Varies

### HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

### WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

### EDR HIGH RISK HISTORICAL RECORDS

### EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

### **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

### **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### FEMA FLOOD ZONE

| Flood Plain Panel at Target Property         | FEMA Source Type   |
|--|--|
| 06037C1590F                                  | FEMA FIRM Flood data   |
| Additional Panels in search area:            | FEMA Source Type   |

| NWI Quad at Target Property<br>BEVERLY HILLS | NWI Electronic<br><u>Data Coverage</u><br>YES - refer to the Overview Map and Detail Map |

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### Site-Specific Hydrogeological Data\*:

| Search Radius:              | 1.25 miles   |
|-----------------------------|--|
| Location Relative to TP:    | 1/2 - 1 Mile NNW   |
| Site Name:                  | Chemold Co Colorado  |
| Site EPA ID Number:         | CA0000476739   |
| Groundwater Flow Direction: | Southeast  |
| Measured Depth to Water:    | approximately 125 feet in the Ballona aquifer.                       |
| Hydraulic Connection:       | The near surface deposits to a depth of 90 feet vary from gravel, to |
|                             | fine sand, to clay of the recent alluvium. The recent alluvium is    |
|                             | underlain by the Silverado aquifer, which is located within sand and |
|                             | gravel deposits with small amounts of clay.                          |
| Sole Source Aquifer:        | No information about a sole source aquifer is available              |
| Data Quality:               | Information based on site-specific subsurface investigations is      |
|                             | documented in the CERCLIS investigation report(s)                    |

### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

|        | LOCATION | GENERAL DIRECTION |
|--------|----------|-------------------|
| MAP ID | FROM TP  | GROUNDWATER FLOW  |

| MAP ID | LOCATION<br>FROM TP | GENERAL DIRECTION<br>GROUNDWATER FLOW |

| 2G     | 1/2 - 1 Mile SSW    | SSW                                   |
| 3G     | 1/2 - 1 Mile South  | SW                                    |

For additional site information, refer to Physical Setting Source Map Findings.

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

### **ROCK STRATIGRAPHIC UNIT**

### **GEOLOGIC AGE IDENTIFICATION**

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

| Soil Component Name:                  | URBAN LAND                      |
|---------------------------------------|---------------------------------|
| Soil Surface Texture:                 | variable                        |
| Hydrologic Group:                     | Not reported                    |
| Soil Drainage Class:                  | Not reported                    |
| Hydric Status: Soil does not meet the | requirements for a hydric soil. |
| Corrosion Potential - Uncoated Steel: | Not Reported                    |
| Depth to Bedrock Min:                 | > 10 inches                     |
|                                       |                                 |

Depth to Bedrock Max: > 10 inches

|       | Soil Layer Information  |          |                    |              |              |                              |                        |
|-------|-------------------------|----------|--------------------|--------------|--------------|------------------------------|------------------------|
|       | Boundary Classification |          |                    |              |              |                              |                        |
| Layer | Upper                   | Lower    | Soil Texture Class | AASHTO Group | Unified Soil | Permeability<br>Rate (in/hr) | Soil Reaction<br>(pH)  |
| 1     | 0 inches                | 6 inches | variable           | Not reported | Not reported | Max: 0.00<br>Min: 0.00       | Max: 0.00<br>Min: 0.00 |

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

| Soil Surface Textures: | loam<br>clay<br>silt loam<br>loamy sand<br>sandy loam<br>fine sand<br>clay loam<br>gravelly - sandy loam<br>coarse sand<br>gravelly - sand<br>sand |

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

### WELL SEARCH DISTANCE INFORMATION

### PHYSICAL SETTING SOURCE RECORDS SEARCHED

#### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

#### HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA Telephone: 877-336-2627 Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife Telephone: 916-445-0411

#### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

#### **GEOLOGIC INFORMATION**

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

#### LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

#### **OTHER STATE DATABASE INFORMATION**

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database Source: Department of Water Resources Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division Telephone: 916-323-1779 Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

**Regulatory Records** 

Department of Toxic Substances Control

Jared Blumenfeld Secretary for Environmental Protection

Meredith Williams, Ph.D. Acting Director 5796 Corporate Avenue Cypress, California 90630

September 25, 2019

Mr. Carry Upton Chief Operating Officer Santa Monica - Malibu Unified School District 1651 16th Street Santa Monica, California 90404

APPROVAL OF PRELIMINARY ENVIRONMENTAL ASSESSMENT AND SUPPLEMENTAL SITE INVESTIGATION REPORTS, JOHN ADAMS MIDDLE SCHOOL, PERFORMING ARTS COMPLEX, 2425 16<sup>TH</sup> STREET, SANTA MONICA, LOS ANGELES COUNTY (SITE CODE: 304677)

Dear Mr. Upton:

The Department of Toxic Substances Control (DTSC) reviewed the following documents for the John Adams Middle School (School), Performing Arts Complex site (Site):

- "Phase I Environmental Site Assessment Report" (Converse Consultants, January 31, 2018) and "Report of Findings – Sampling for Lead, Pesticides, and PCBs in Soil" (Converse Consultants) received on July 26, 2019, collectively as a Preliminary Environmental Assessment Equivalent Report (hereinafter referred to as PEA);
- "Limited Lead-Impacted Soil Housekeeping Activities" Supplemental Site Investigation (SSI) Report (Converse Consultants, August 13, 2019) received on August 14, 2019; and
- Response to DTSC comments on the SSI received on September 13, 2019.

According to the PEA, the Site consists of approximately 1-acre area in size and is located on the north central portion of the School campus along Pearl Street. The School is bordered to the northeast by 17th Street, southeast by Ocean Park Boulevard, southwest by 16th Street and northwest by Pearl Street. The Site is currently developed as a concrete auditorium. According to historical sources, the School campus has been used as a school from 1934 until present. The proposed project will replace and augment the existing concrete auditorium building and auxiliary spaces on campus to

Mr. Carry Upton September 25, 2019 Page 2

meet current and future needs, including a new performing arts complex of approximately 30,000 to 35,000 square feet. Based on the age of the Site buildings, lead from lead-based paint, polychlorinated biphenyls (PCBs) from building materials and organochlorine pesticides from termiticides application are the recognized environmental conditions.

The PEA includes Site background information and a summary of investigation activities completed at the Site. The PEA concluded that lead concentrations in samples B4, B4A, and B4H at 0.5 feet below ground surface (bgs) (94.3, 92.8, and 157 mg/kg, respectively) as well as B4 at 2.5 feet bgs (99.3 mg/kg) exceeded the screening level and recommended a limited hot spot housekeeping of lead impacted soil around these locations. The dimensions of the impacted area are approximately 10' x 10' x 3', resulting in a total volume of approximately 11 cubic yards.

On August 13, 2019, the Santa Monica - Malibu Unified School District (District) submitted a SSI Report (Limited Lead-Impacted Soil Housekeeping Activities). The SSI concluded that approximately 10.5 cubic yards of lead contaminated soil in excess of the screening level of 80 mg/kg has been excavated and shipped offsite and recommended no further action at the Site.

In addition, the District notified DTSC on September 23, 2019, that it has complied with all public review and comment requirements for the PEA pursuant to Option A (Ed. Code § 17213.1, subd. (a)(6)(A)). The District made the PEA available for public review and comment from July 31, 2019 through August 30, 2019 and a public hearing was held on August 15, 2019. No public comments were received regarding the PEA.

Based on review of the PEA and the SSI, neither a release of hazardous material nor the presence of a naturally occurring hazardous material, which would pose a threat to public health or the environment under unrestricted land use was indicated at the Site. Therefore, DTSC concurs with the conclusion of the TM that further environmental investigation of the Site is not required and hereby approves the PEA and SSI.

Pursuant to Education Code section 17213.2, subdivision (e), if a previously unidentified release or threatened release of a hazardous material or the presence of a naturally occurring hazardous material is discovered anytime during construction at the site, the district shall cease all construction activities at the site and notify DTSC. Additional assessment, investigation or cleanup may be required.

Mr. Carry Upton September 25, 2019 Page 3

If you have any questions regarding the project, please contact me at (714) 484-5368 or by e-mail at <u>Shahir.Haddad@dtsc.ca.gov</u> or Mr. Johnson P. Abraham, Project Manager, at (714) 484-5380 or by e-mail at <u>Johnson.Abraham@dtsc.ca.gov</u>.

Sincerely,

Shahir Haddad, P.E. Supervising Engineer Brownfields Restoration and School Evaluation Branch Site Mitigation and Restoration Program
