Middle School:

High School:

Office/Admin:

Program Overview: The Go Green Challenge is a popular program for public school districts to encourage sustainable behavior and increase participation in environmental programs. The ultimate goal is to provide measurable actions for classrooms and office spaces to take. Resources are provided to ensure all actions can be taken. The winners of the challenge participate in the most actions and can prove their results.

Goal: Increase sustainability within SMMUSD as mapped out in the Districtwide Plan for sustainability by challenging both students and faculty to take action. The challenge is an educational tool that provides measurable results for resource reduction and behavior change.

Participation: All classrooms and offices are encouraged to participate!

Materials: A checklist is available for download above. The checklist incorporates measurable actions that the participants can complete. Resources/training will be available for all actions found on this site.

Time Frame: Two challenges per year in fall and spring.
Fall September 1st – December 20th, 2019

Winning: All participating classrooms/offices submit their challenge checklist sheet and reporting materials to Sustainability Coordinator at the end of the challenge, December 20th, 2019. The checklist and reporting materials will be evaluated and the classrooms and offices with the most participation win.
