Reports and Announcements (regular agenda items)

Principal's Report

-Will be saved for later in the meeting

Student Reports-

-For science, students advocated for biology studies with dissections, with parent consent. Frogs, lobsters, and other animals were dissected. Videos were created. For humanities, students will be writing essays for most recent novels. Some independent studies include cupcake making/decorating and stock market investing.

Community Organization Reports (to include but not limited to the following):

PTSA

-From Emily Magid: PTSA working hard to move everything onto online platforms, such as Konstella, including SMASH Bashes. Wondering how to host traditional SMASH events online and still being meaningful. PTSA is seeking feedback about how well the virtual platforms are working for families.

### Student Council

- Student Council meeting held today with 18 students attending. 6 children from Core 1, 9 from Core 2, and 3 from Core 3 were represented. Today, students brainstormed ideas for school spirit days and voted on having the spirit days coincide with the Community Group meetings. Want these days to be open and inclusive for everyone.

Old Business: No feedback regarding SPSA from Ed Services. It will be presented at the SMMUSD Board of Ed meeting 12/9/2020.

### New Business:

Reviewed SMASH Safety Plan including COVID compliant screening, containment and cleaning protocols. SMASH Safety Plan will be presented to SMMUSD Board of Ed in January 2021. All updated SMMUSD COVID related information and procedures can be found at <https://www.smmusd.org/domain/2885>

Site council is considered the SMASH safety team since it is a small school site. District website has COVID information that is updated as more data is available. A response guide is available for how to respond if someone (student or staff) is displaying symptoms of COVID. Isolation on campus is the hallway between the front office building and the library (covered corridor). Nurse Kelsey (part-time) and health office specialists (2) will be on campus and available to determine if isolation is necessary. Funding is earmarked for the additional health office specialist during the pandemic. There is information for when someone has been sent home, but this information is "premature" because this is being changed by the health department weekly. Free testing sites are listed in District information, yet no budgetary planning or arrangements are being considered for onsite school testing. Approved cleaning products that are effective and considered less toxic are listed on the website. PPE is listed by type of staff member as well.

### Community participation

- None at this time

Site Safety plan adopted with the understanding that any COVID protocols will be amended as necessary by health department and District
