# CCSS WHERE TO FOCUS GRADE 1 MATHEMATICS

T 0

This document shows where students and teachers should spend the large majority of their time in order to meet the expectations of the Standards.

Not all content in a given grade is emphasized equally in the Standards. Some clusters require greater emphasis than others based on the depth of the ideas, the time that they take to master, and/or their importance to future mathematics or the demands of college and career readiness. More time in these areas is also necessary for students to meet the Standards for Mathematical Practice. To say that some things have greater emphasis is not to say that anything in the Standards can safely be neglected in instruction. Neglecting material will leave gaps in student skill and understanding and may leave students unprepared for the challenges of a later grade.

Students should spend the large majority<sup>1</sup> of their time on the major work of the grade ( $\blacksquare$ ). Supporting work ( $\blacksquare$ ) and, where appropriate, additional work ( $\bigcirc$ ) can engage students in the major work of the grade.<sup>2, 3</sup>

#### MAJOR, SUPPORTING, AND ADDITIONAL CLUSTERS FOR GRADE 1

Emphases are given at the cluster level. Refer to the Common Core State Standards for Mathematics for the specific standards that fall within each cluster.

Key: Major Clusters

■ Supporting Clusters

Additional Clusters

1.OA.A Represent and solve problems involving addition and subtraction.

1.OA.B Understand and apply properties of operations and the relationship between addition and subtraction.

1.OA.C Add and subtract within 20.

1.OA.D Work with addition and subtraction equations.

1.NBT.A Extending the counting sequence.

1.NBT.B Understand place value.

1.NBT.C Use place value understanding and properties of operations to add and subtract.

1.MD.A | Measure lengths indirectly and by iterating length units.

1.MD.B O Tell and write time.

1.MD.C Represent and interpret data.

1.G.A Reason with shapes and their attributes.

### HIGHLIGHTS OF MAJOR WORK IN GRADES K-8

Addition and subtraction – concepts, skills, and problem solving; place value
Multiplication and division of whole numbers and fractions – concepts, skills, and problem solving
Ratios and proportional relationships; early expressions and equations
Ratios and proportional relationships; arithmetic of rational numbers
Linear algebra and linear functions

#### **REQUIRED FLUENCIES FOR GRADE 1**

**1.OA.C.6** Add/subtract within 10

<sup>1</sup> At least 65% and up to approximately 85% of class time, with Grades K-2 nearer the upper end of that range, should be devoted to the major work of the grade. For more information, see Criterion #1 of the K-8 Publishers' Criteria for the Common Core State Standards for Mathematics www.achievethecore.org/publisherscriteria.

<sup>2</sup> Refer also to criterion #3 in the K-8 Publishers' Criteria for the Common Core State Standards for Mathematics www.achievethecore.org/publisherscriteria.

<sup>3</sup> Note, the critical areas are a survey of what will be taught at each grade level; the major work is the subset of topics that deserve the large majority of instructional time during a given year to best prepare students for college and careers.

# CCSS WHERE TO FOCUS GRADE 1 MATHEMATICS

### An important subset of the major work in grades K-8 is the progression that leads toward middle school algebra.

K	1	2	3	4	5	6	7	8
Know number names and the count sequence  Count to tell the number of objects  Compare numbers  Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from  Work with numbers 11- 19 to gain foundations for place value	Represent and solve problems involving addition and subtraction  Understand and apply properties of operations and the relationship between addition and subtraction  Add and subtract within 20  Work with addition and subtraction equations  Extend the counting sequence  Understand place value  Use place value understanding and properties of	Represent and solve problems involving addition and subtraction  Add and subtract within 20  Understand place value  Use place value understanding and properties of operations to add and subtract  Measure and estimate lengths in standard units  Relate addition and subtraction to length	Represent & solve problems involving multiplication and division  Understand properties of multiplication and the relationship between multiplication and division  Multiply & divide within 100  Solve problems involving the four operations, and identify & explain patterns in arithmetic  Develop understanding of fractions as numbers  Solve problems involving measurement and estimation of	Use the four operations with whole numbers to solve problems  Generalize place value understanding for multi-digit whole numbers  Use place value understanding and properties of operations to perform multidigit arithmetic  Extend understanding of fraction equivalence and ordering  Build fractions from unit fractions by applying and extending previous understandings of operations	Understand the place value system  Perform operations with multi-digit whole numbers and decimals to hundredths  Use equivalent fractions as a strategy to add and subtract fractions  Apply and extend previous understandings of multiplication and division to multiply and divide fractions  Geometric measurement: understand concepts of volume and relate volume to multiplication and to	Apply and extend previous understandings of multiplication and division to divide fractions by fractions  Apply and extend previous understandings of numbers to the system of rational numbers  Understand ratio concepts and use ratio reasoning to solve problems  Apply and extend previous understandings of arithmetic to algebraic expressions  Reason about and solve one-variable	Apply and extend previous understanding of operations with fractions to add, subtract, multiply, and divide rational numbers  Analyze proportional relationships and use them to solve real-world and mathematical problems  Use properties of operations to generate equivalent expressions  Solve real-life and mathematical problems using numerical and algebraic expressions and equations	Work with radical and integer exponents  Understand the connections between proportional relationships, lines, and linear equations**  Analyze and solve linear equations and pairs of simultaneous linear equations  Define, evaluate, and compare functions  Use functions to mode relationships between quantities
	operations to add and subtract  Measure lengths indirectly and by iterating length units		intervals of time, liquid volumes, & masses of objects Geometric measurement:	Understand decimal notation for fractions, and compare decimal fractions	addition  Graph points in the coordinate plane to solve real-world and mathematical	equations and inequalities  Represent and analyze quantitative relationships between		
			understand concepts of area and relate area to multiplication and to addition		problems*	dependent and independent variables		

<sup>\*</sup> Indicates a cluster that is well thought of as a part of a student's progress to algebra, but that is currently not designated as major by the assessment consortia in their draft materials. Apart from the one asterisked exception, the clusters listed here are a subset of those designated as major in the assessment consortia's draft documents.

<sup>\*\*</sup> Depends on similarity ideas from geometry to show that slope can be defined and then used to show that a linear equation has a graph which is a straight line and conversely.
