

District Energy Totals

All

There are several projects currently scoped over the next few years which will affect the District's total electric usage. IES will coordinate closely with the District to ensure awareness as to the progress of Facilities Improvement Projects and any others as they pertain to energy management. Thus far, all LED lighting projects were completed as of March 2019. Additionally, several of the sites were retrofitted with HVAC units, and are consequently operating at a higher consumption rate. Lastly, SAMOHI and Malibu HS are currently undergoing major construction. The following report breaks down energy usage by site considering all these factors.

Total Electric kWh by Month and Fiscal Year

Total Electric kWh by Month and Fiscal Year

Total Electric Cost (\$) by Month

Total Energy Use (kWh) by Month

Site Overview

In the months of January through April 2019, Bus Barn showed an decrease in energy usage of 6.8%, yielding a savings of about \$265. There were no new HVAC units installed or Prop 39, indicating these savings came from behavioral measure changes or an alternate form of energy savings. From the months of July 2018-April 2019, approximately 2,046 kWh (5.8% reduction) has been saved and \$336.

Total Electric kWh by Month and Fiscal Year

Total Electric Cost (\$) by Month

Total Energy Use (kWh) by Month

Site Overview

In the months of January through April 2019, Franklin Elementary showed an increase in energy usage of 40.1% and an increase in cost of \$3,154. This is most likely due to the installation of new AC units in classrooms which in previous years did not have mechanical cooling. Since there was less need for cooling during the winter months, energy usage from the AC units are just recently starting to increase energy usage. From the months of July 2018-April 2019, energy increased by about 34,875 kWh (14.7% increase), though costs decreased by \$1,177.
