### **Job Report on Mechanical Cleaning of existing HVAC System and Ductwork**

We have recently performed our standard mechanical cleaning of HVAC systems and their associated air-ducts for 2 classrooms at your jobsite location, Grant School in Santa Monica.

We found a significant environmental dust and contamination build-up around inside of all existing air ducts and their associated Bard AC units. After our detailed standard mechanical cleaning of existing HVAC systems and their air-ducts have been cleaned and will provide a decontaminated for an optimum clean air stream to those occupied classrooms. Our work performance can be seen in several pictures taken before and after cleaning.

**Service Care Recommendation:** All those air-ducts along with their associated units require this regular cleaning within 3 years or so to maintain equipment efficiency and indoor air quality.

Yours sincerely,

Faheem Qureshi

Snr. Project Estimator & Consultant
